25X1A

SUMMARY

FAR EAST

1. Popular pressure demands Japanese government act in fisheries dispute (page 3).

25X1

3. Chinese mainland harvests considerably below last year's (page 4).

SOUTHEAST ASIA

4. Burmese oppose resumption of Bangkok talks (page 4).

NEAR EAST - AFRICA

Israeli military activity reported along Egyptian border (page 5).

6. Britain to make conciliatory gesture toward Iran (page 7).

LATIN AMERICA

Chile reportedly receptive to Soviet bid for 50,000 tons of copper (page 7).

Panamanian president reportedly to use Washington visit to press Eisenhower on Canal issue (page 8).

3. Chinese mainland harvests considerably below last year's: The American consul general in Hong Kong believes that Chinese mainland grain production in 1953 will be considerably smaller than last year. The Chinese Communist press has stated that the autumn harvests in certain districts declined this year due to drought and flood, and refugees and travelers from the mainland continue to confirm that agricultural difficulties in both Manchuria and China proper were greater this summer than in 1952. Comment: Government income, a large part of which is requisitioned grain, will probably decline as a result of the poor 1953 harvest, and therefore the construction program might have to be curtailed. Despite the prospect of widespread food shortages next spring, Pelping will probably continue to meet its commitments to export large quantities of rice and vegetable oilseeds because of its need for foreign exchange. SOUTHEAST ASIA 4. Burmese oppose resumption of Bangkok talks: The Burmese ambassador in Bangkok told an officer of the American embassy on 18 September that there was no purpose in reopening the four-power negotiations for the evacuation of Chinese Nationalist troops from Burma. He indicated that further discussion should be conducted on the "diplomatic level" and suggested New York as the most suitable site. - 4 -		Approved for t	terease 20		DF 19100913A

Comment: The Burmese government regards the last-minute Nationalist acceptance of the committee's evacuation plan as an opportunistic maneuver to impress the UN.

The Burmese withdrawal from the Bangkok talks provides the Nationalists with their main defensive argument in the General Assembly debate on Burma's complaint. The Taipei radio has already blamed the Burmese for the breakdown of negotiations and insinuated that they acted under the influence of the Soviet bloc.

NEAR EAST - AFRICA

•		NEAR EAST - AFRICA	
	5.	Israeli military activity reported along Egyptian border:	
25X1A		On 15 September twenty armed Israelis with military communications equipment entered the El Auja demilitarized neutral zone on the Egyptian-Israeli border (see map, p. 6), The Israelis reportedly occupied a defensive position near Birein within the neutral zone and informed a UN Mixed Armistice Commission observer that they had orders to remain the entire day.	25X
141		At least two weeks earlier a new Israeli tent settlement had been established on Hill 311 near the neutral zone. In the past two weeks Israeli troops have made almost daily armed incursions into the neutral zone and attacked Arab bedouin settlements. Moreover, the insistence of UN observers that the Israelis leave the zone has apparently been ignored.	
	y a	activity is apparently a deliberate move on the part of the Ben-Gurion government to gain control of the El Auja zone, which is believed to have sufficient water resources to sustain several Israeli settlements	X1 25X

20 Sept 53

Comment: This is the first report that Israel may now wish to enlarge its territorial control in an area it has long claimed and desired for future settlements. If the report is true, it is likely to increase the tension in the neighboring Arab states, which have recently protested Israeli construction work near the Syrian border as well as incidents along the Jordan frontier.

6.	Britain to make concili	atory gesture toward Iran	0

			20 Sept 53

The Anaconda representative was convinced that Chile will sell to the Orbit unless it is deterred by the current Washington negotiations for American purchase of Chile's unsold copper stocks, amounting to some 100,000 tons.

25X1

Chile's current financial crisis, however, puts Ibanez under extreme pressure to sell copper to anyone willing to pay Chile's price.

The present world price for copper fluctuates just below 30 cents per pound. The 50,000 tons now under discussion is approximately one eighth of Chile's annual production.

8. Panamanian president reportedly to use Washington visit to press Eisenhower on Canal issue:

25X1

25X1A

President
Remon expressed strong displeasure at the arrangements for his forthcoming state
visit to Washington and declared that he would insist on political discussions with President Eisenhower and a joint presidential statement on Canal Zone problems.

25X1

Comment: Remon, who is scheduled to arrive in Washington on 27 September, has taken on himself complete responsibility for the outcome of the canal treaty negotiations which opened in Washington on 10 September.

Remon has been repeatedly warned that the United States intends to discuss only the "fulfillment and interpretation" of existing treaties, but appears to have been carried away by his own propaganda and to believe he can exact major concessions directly from President Eisenhower.
